

## **Informatica OBIEE DAC Course Content:35-40hours**

### Course Outline

DAC stands for Data Warehouse Application Console. It is an essential component of Oracle BI application architecture.

**DAC serves the following purposes:**

**1. •DAC is a metadata driven administration and deployment tool for ETL and data warehouse objects**

**2. Used by warehouse developers and ETL Administrator**

**3. Application Configuration**

- Manages metadata-driven task dependencies and relationships
- Allows creating custom ETL execution plans
- Allows for dry-run development and testing

**4. Execution**

- Enables parallel loading for high performance ETL
- Facilitates in index management and database statistics collection
- Automates change capture for Siebel OLTP
- Assists in capturing deleted records
- Fine grain restartability

**5. Monitoring**

- Enables remote admin and monitoring
- Provides runtime metadata validation checks
- Provides in-context documentation
