- Creating Calculation Measures using Physical Columns
- Creating Calculation Measures using Calculation Wizard
- Creating Dimensional Hierarchies
- Creating Level Based Measures
- Define Share Measure and Rank Measures

Partition

- Types of Partitions
- Modelling a value Based Partition
- Using Dynamic Repository Variables
- Time Series Functions
- Creating Users and Groups
- Assigning permissions to users

Security

- Object Level Security
- Data Level Security
- Setting Query Limits

Cache Management

- Introduction to Cache
- Cache Features
- Modifying Cache parameters
- Purge the Cache
- Seed the Cache
- Slowly Changing Dimensions
- Importance and implementing SCD
- Configuring the Event Poll Tables

Report Developer

- Introduction to Reports

- Different Views
- Dashboard
- Creating and Modifying Reports
- Creating Dashboards

Dash Boards Pages

- Working with DashBoard objects
- Working with filters and Promts
- Guided Navigation Links
- Static
- Dynamic
- Cofiguring Bi Scheduler tables
- Configuring Scheduler
- Creating and delivering an ibot
- Introduction and working with BI Catlog Manager
- Introduction and working with ODBC Client

DAC

- DW Introduction
- Terminology
- Design
- Setup
- Execute
- Scheduling DAC

Bi-publisher

- Installing and configuring Bi Publisher
- Creating RTF Templates
- Creating PDF Templates
- Creating Reports in XL Templates

Introduction to Bi –Apps

- Working with Prebuilt Applications Repository

b1 Onlinetrainings
